# RECYCLING CONTAMINATION

## WHAT IS CONTAMINATION?

Incorrect materials, soiled items, non-recyclables and items not loose.

### These do NOT belong in your tote

- plastic bags
- glass
- dirty containers
- styrofoam
- batteries & electronics
- scrap metal
- chip bags
- paint cans
- foil lined bowls
- paper towels/napkins
- dirt, hoses, lawn clippings

## WHY IS CONTAMINATION A PROBLEM?

- Reduces Recyclability - entire loads of recyclable materials may be sent to the landfill instead!
- Increased Processing Cost - separating contaminants adds extra steps and costs.
- Equipment Damage - contaminants like plastic bags can get wrapped in the sorting equipment causing damage and downtime
- Health & Safety Concerns - food waste and hazardous materials can be dangerous for recycling facility workers

**Let's work together to keep contamination out!**

For more information about what is accepted in your recycling tote please visit:

[Recyclebc.ca/what-can-i-recycle/](https://Recyclebc.ca/what-can-i-recycle/)

**REMEMBER - some things that ARE recyclable just need to go to the depot and NOT your curbside tote!**

**Take To Depot:** glass, flexible plastic, foam packaging, electronics

**Curbside Tote:** cardboard, clean aluminum cans, clean plastic bottles and containers
